## **ALUMINUM EXTRUSIONS**

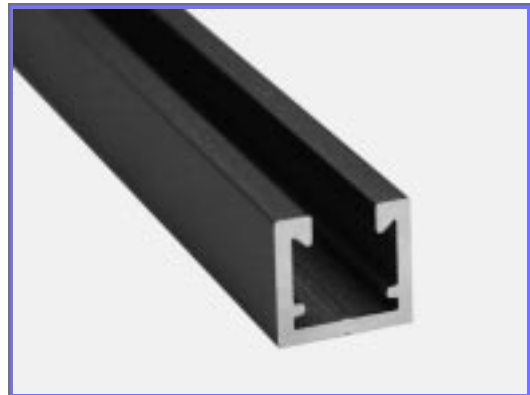

**LARGE EXTRUSION**

**CORNER ANGLE EXTRUSION**

**MEDIUM EXTRUSION**

**SMALL EXTRUSION**

**The Signfix aluminum extrusions are in aluminum alloy 6061-T6. Each of these extrusions can be attached to any standard sign structure support through the use of the Signfix clamping hardware. The extrusions offer proper support of the sign blank for maximum reflectivity and can be attached to the sign blank without damaging the reflective sheeting. The Signfix Sign Hardware System is designed to meet AASHTO Standard Specifications for Highway Signs, Luminaries and Traffic Signs (1994).**
